Protected CFDs and CFDs on margin

On its Website the Company is entitled to provide financial services of Contracts for Difference (CFD) with intrinsic protection (Protected CFDs). The risk of loss for Protected CFDs is limited to 50% of the sum invested by the Client in a particular CFD contract.

In this instance, when the loss for a position reaches 50%, an additional 20% of the original investment amount is reserved from the Client's account. If the CFD position takes further losses, the Client's available balance is further reduced by 20% accordingly. The Client can limit the additional funds reserved on his account balance by specifying his acceptable level of loss for a CFD position.

In both features of CFDs described above, the Company offers (1) margin close-out rule set a 50% to ensure Clients' margin is not eroded close to zero; and (b) negative account balance protection i.e. the Client's losses may never exceed the total amount of funds available in the Client's account. In addition, the risk of loss in relation to the corresponding potential benefits for CFDs described above, is

reasonably understandable in light of the particular nature of the proposed financial contract.

It should be noted that the applicable legislation applied to such financial institutions outside of Cyprus (but within EEA) may be different from the applicable legislation in Cyprus. In the event of insolvency, your funds may be treated differently from any treatment applicable to funds held in segregated accounts in Cyprus.

The financial institution, to which we will pass your money, may hold it in an omnibus account. Hence, in the event of the insolvency or any other comparable proceedings in relation to that financial institution, we may only have an unsecured claim against the financial institution on your behalf, and you will be exposed to the risk that the money received by us from the financial institution is insufficient to satisfy your claims.
